

JAPAN IMPERILS U. S. INTERESTS

Massachusetts Senator Attacks Shantung Settlement in Senate.

FIX NO RETURN TIME

Omission of Date Is Vital in Accepting Promise Says Republican Leader.

WASHINGTON, Oct. 14.—Japan's building a big western empire which will become a peer to America, and threaten the safety of the world, Senator Lodge of Massachusetts, the republican leader, declared today in the senate in urging rejection of the shantung settlement of the peace treaty, under which Germany's rights in shantung would be turned over to China instead of being awarded Japan.

Reading with reluctance, Japan is taking control of China, Senator Lodge said, and he predicted that the world would be divided into two camps, one for the safety of the United States and Europe.

"It is impossible to see," said Senator Lodge, "how any conscientious American can consent to any act or treaty that will extend the power of such a nation as Japan over a country like China, especially when the United States deliberately drew China into the war with at least an implied if not an express promise to give assistance and protection at the peace conference."

Fixed No Time.

"The principal argument made by those who sustained the delivery of shantung to Japan is that Japan has promised to return it to China to return it to China. What war promises she has made were all started by one vital omission. In no instance do I find that Japan ever fixed a time when she would return the province to its rightful owners. To determine what Japan is likely to do it is necessary to consider what she has done for 15 years."

Japan was charged by Senator Lodge with breaking unnumberable pledges regarding her course in China and Korea with violating the open door policy; destroying for-

merly strengthened their methods of creating an open door and have been more aggressive. If not to say in-olent in their treatment of the Chinese.

In an effort to obtain control of China, Japan has almost forced upon us her Mr. Lodge declared.

"It is the deliberate opinion of both foreign and other observers," he said, "that there is no other way of escape for Japan but to take the best of the situation of China at a time when other nations were so completely that they could not resist. Japan's purpose is to take the best of the situation of China at a time when other nations were so completely that they could not resist."

Award of these rights to Japan, he said, was a wrong to man and to the cause of freedom and justice.

Have Become Insolent.

After the outbreak of the war the Japanese, Mr. Lodge said, "appa-

Secretary of War Newton D. Baker tomorrow will make a pronouncement on the government policy in the longshoremen's strike in New York, which is spreading to other points along the Atlantic sea-

board and which has brought out thousands of marine workers and many other transport workers in sympathy, endangering the health of New York's population, and inflicting great hardships there and elsewhere. Secretary Baker will make this pronouncement at Cleveland where he will speak tomorrow before the federation of women's clubs. The previous stand of Secretary Baker that army vessels will not be held up by the strike makes it certain, it was indicated, that he will take a strong stand for the government against the strike, which had been outlawed by the international officers of the longshoremen.
